

Construction of upgrades and improvements to the Berkeley Township Municipal Utilities Authority's Northern Boulevard Water Storage Tank, for \$1,151,380.00 were financed by the New Jersey Water Bank (NJWB). The NJWB is a State Revolving Fund program jointly administered by the New Jersey Department of Environmental Protection (DEP) and the New Jersey Infrastructure Bank (NJIB) and uses a combination of funds provided by the United States Environmental Protection Agency, the DEP, and the NJIB to provide very low interest loans to borrowers for environmental infrastructure projects.

This project will provide water quality benefits through the cleaning and rehabilitation of the Berkeley Township Municipal Utilities Authority's Northern Boulevard Water Storage Tank. This will protect the structural integrity and continued reliability of the Township of Berkeley water distribution system for residents and businesses, and increase the lifespan of the structure.

State Revolving Fund programs around the nation provide states and communities the resources necessary to maintain and improve the infrastructure protecting our valuable water resources nationwide.
